Clinic app

Have you ever:

I Waited in long lines at a crowded clinic?

II Forgotten a doctor’s appointment?

III Missed taking your medication on time?

IV Lost track of your health info?

If yes, you’re not alone.

Our values

Easy Booking

Schedule appointments quickly and skip the waiting.

Smart Reminders

Get notified for visits and medication on time.

Secure Records

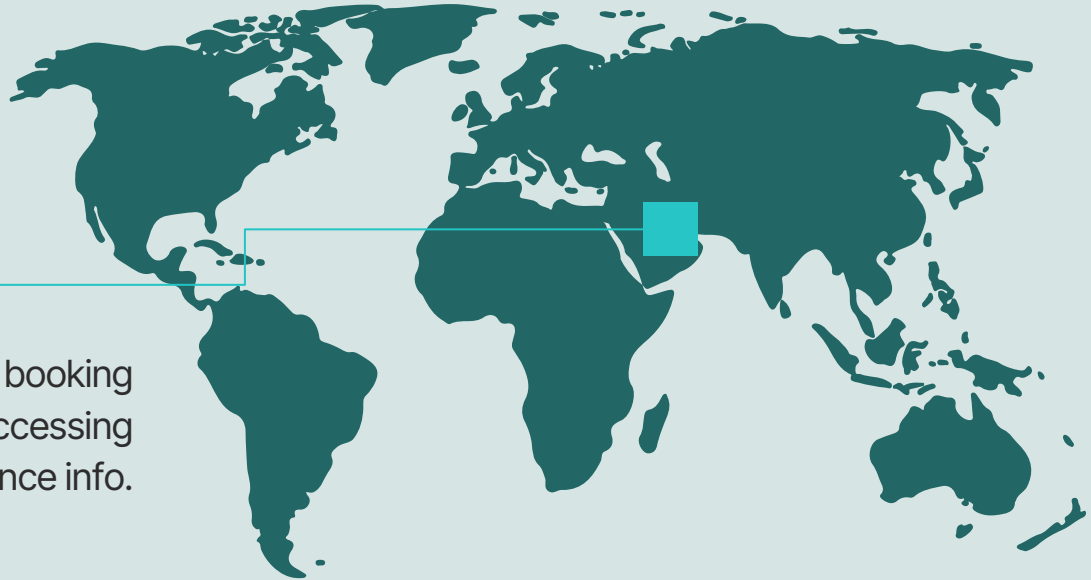
Access your health data anytime, safely stored.

Communication

Stay in touch with your clinic through the app.

Similar applications

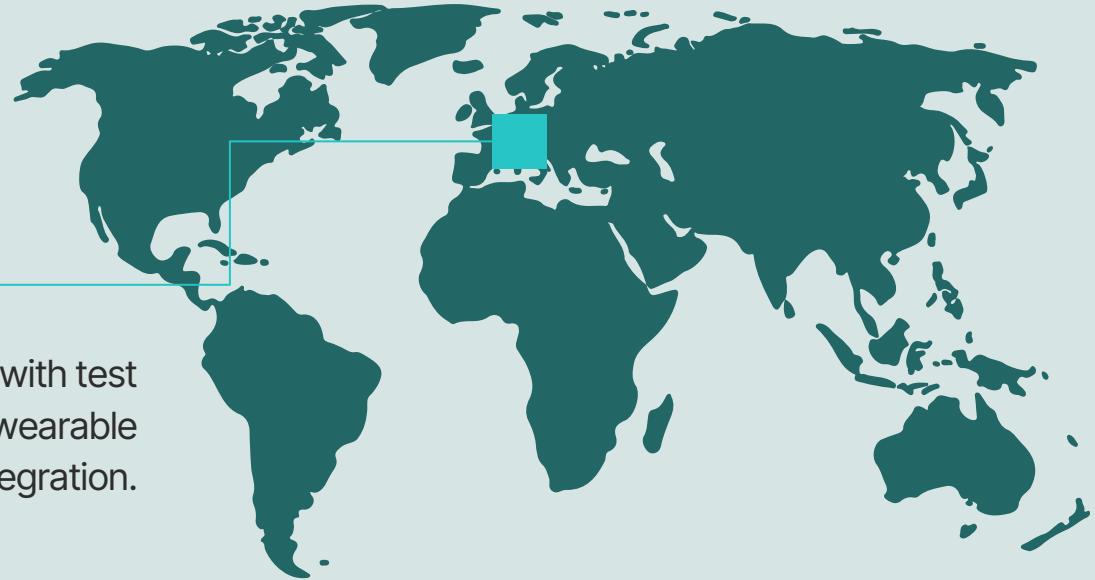
Nareakum app



Qatar

Official app for booking appointments and accessing insurance info.

Well app



Switzerland

Digital health app with test results, bookings, and wearable integration.

Zocdoc app

USA

Connects patients to doctors with instant booking and online payments.

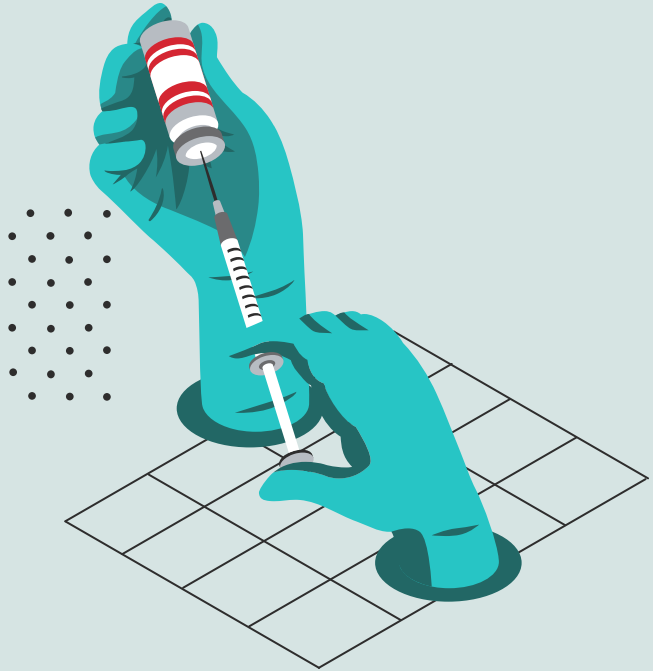
Advantages and disadvantages



What sets us apart?

Medication Reminders

Automatic alerts for prescribed medications.

QR Access

Quick doctor access to records and prescriptions via QR.

Medical Records

Unified file showing current conditions and medications.

What sets us apart?

Visit Archive

Full history of previous consultations, easily accessible.

Appointment Management

See upcoming visits and reschedule when needed.

Secretary Booking

Staff can book on behalf of the patient when needed.

What sets us apart?

Visit Notifications

Reminders for upcoming visits and alerts for cancellations.

What We Don’t Offer..

No Online Payment

Unlike Zocdoc, there’s no option to pay for consultations digitally.

No Video Consultations

Lacks telemedicine (video call) functionality, which is becoming essential.

No Doctor Comments

Users can't see or leave comments for doctors

No Smart Device Integration

Missing integration with wearables or health devices for live data syncing.

Future prospects

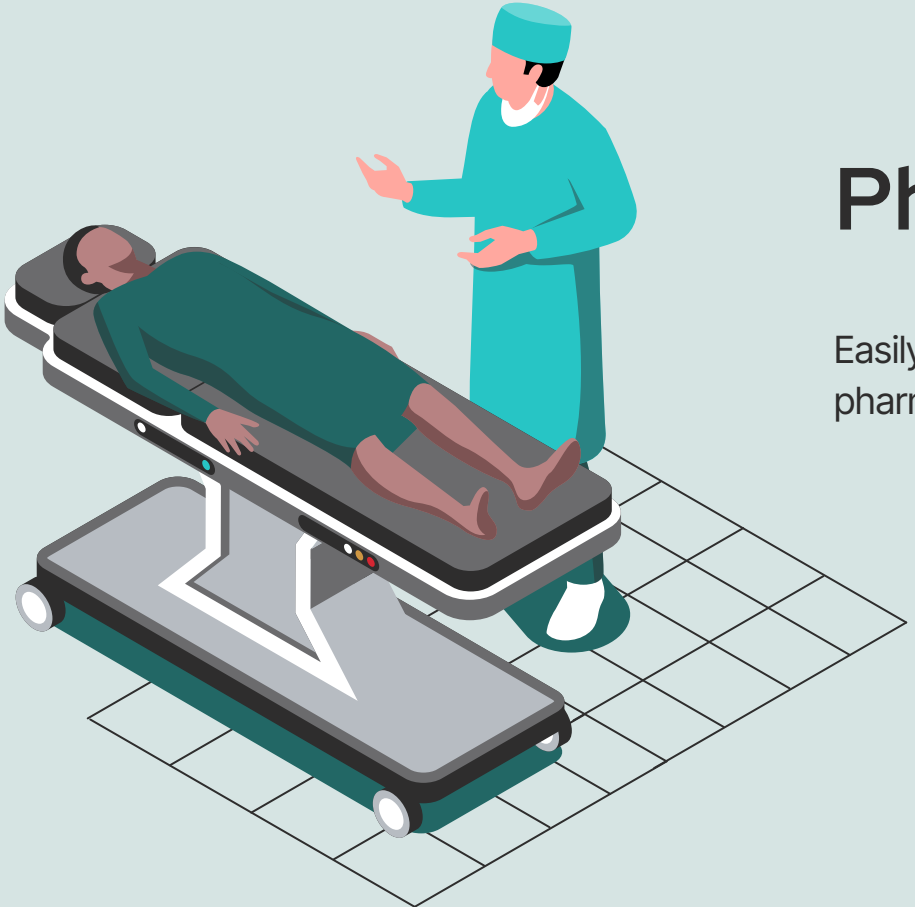
Integration with a central database?

IA Assistant?

Our ambition is to build an intelligent AI assistant capable of understanding patients' symptoms and guiding them to the right medical specialty within our clinic. We aim to reduce confusion and help patients get the care they need faster, through a smooth, human-like interaction that builds comfort and trust.

Family?

A future where every mother can easily book appointments and track her children’s health—anytime, anywhere, all from one app.



Pharmacy?

Easily download a PDF version to show at the pharmacy

Mockups

Prepare to verify the Figma UI design.

Thanks!
